Professional Experience

Molex

Waterloo, ON, Canada

Embedded Software Developer Intern/Co-op

January 2022 – August 2022

- **Enhanced the reliability and performance of a multi-threaded legacy codebase by refactoring it into 2 single concurrent processes**, resulting in a 10% decrease in runtime.
- **Designed and executed a comprehensive suite of unit and integration tests**, covering various scenarios including edge cases and boundary conditions, to verify internal functionality, proper parameter usage, and accurate data handling.
- **Demonstrated strong adherence to the AGILE methodology by actively participating in sprint planning, daily stand-ups, and backlog refinement**. Collaborated with team members to promptly identify and resolve issues, ensuring efficient workflow, and timely achievement of sprint goals.
- **Skills Utilized:** C, Python, Cantata, Jira, Bitbucket

TD Bank

Toronto, ON, Canada

Software Developer Intern/Co-op

September 2021 – December 2021

- Leveraged the SSIS platform to seamlessly combine datasets from multiple departments, **performing advanced data modeling and data profiling queries** to extract valuable insights using SQL.
- **Developed customized functions within the RSA ARCHER application**, tailoring solutions to meet the specific needs of TD Bank's employees.
- **Skills Utilized:** C#, SQL, SSIS (SQL Server Integration Services), RSA ARCHER, Jira, Bitbucket

MAX Gala

Toronto, ON, Canada

Software Developer Contract

June 2021 – August 2021

- **Implemented a new feature on the MAX Aspire web application**, empowering users to post and answer questions, fostering collaboration and knowledge sharing among experienced professionals and early-career individuals.
- **Enhanced the functionality and performance of the MAX Aspire web application**, resulting in improved user experience and 20% faster response times.
- **Skills Utilized:** AWS (Amazon RDS, S3, Lambda), Docker, React.js, Express.js, Python PostgreSQL, GitHub, Git

Education

McMaster University – Bachelor's in Electrical and Biomedical Engineering

Graduated April 2023

- **Relevant Courses:** Object-oriented programming in C, Data Structures & Algorithms in Java, Capstone Course

Skills

Languages: Java, JavaScript, Python, C, C++, C#, SQL, PostgreSQL, HTML, CSS, MATLAB

Technologies: Node.js, React.js, Express.js, Git, GitHub, MongoDB, Docker, AWS, Google Cloud

Tools: Visual Studio, Visual Studio Code, Arduino IDE, Cantata, Atlassian Development Tools

Projects

Capstone Project – Voice Activated Bike Turn Signal

September 2022 – April 2023

- **Collaborated as a key member of a 4-person team to conceive, design, and develop** a voice-activated bike turn signal device, enabling users to conveniently indicate their intended turns.
- **Utilized Edge Impulse and leveraged audio samples from Google Speech Commands to develop a machine learning model (MLM)** capable of accurately detecting voice commands for left and right turns.
- **Demonstrated technical proficiency by uploading the MLM onto an Arduino Nano 33 BLE board and implementing real-time processing of voice commands using C++**. This functionality triggered LED lights, providing clear visual cues to the user and other individuals.
- **Skills Utilized:** Arduino IDE, Edge Impulse, Tensor Flow, C++, GitHub, Git

iOS and Android Parking App

May 2023 – Present

- **Lead developer** in a 4-member team creating a transformative **Android and iOS app**, streamlining parking space rental and hosting. Employed the **MERN stack** and **Google Cloud** for a flexible, scalable application.
- Took charge of the **front-end design and development**, seamlessly **integrating the Google Maps API** to enhance user engagement. This addition allowed for visual mapping of available parking spaces within the app.
- **Skills Utilized:** Google Cloud, MERN Stack (MongoDB, Express.js, React, Node.js), JavaScript, Expo Framework
